

# STARTING THE GAME

At the title screen, you will have three options.

## NEW GAME

Select this option to begin a new game. You'll start at Chapter 1 and proceed through the story.

## DATA LOAD

Select this option to continue a previously saved game. Just point at a save file and press the A Button to confirm your choice.

## CONFIG

Select this option to adjust the game settings.

### ▼ Config Menu

- BGM: Turn the background music on or off
- SE: Turn the sound effects on or off
- Voice: Turn the voices on or off
- Rumble: Turn the Rumble Feature on or off
- OK: Confirm the changes you've made

### NOTE:

Changes to the settings will only be saved if "OK" is selected.

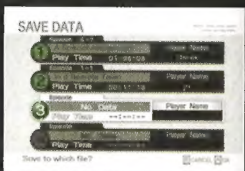

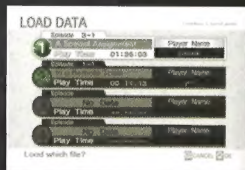

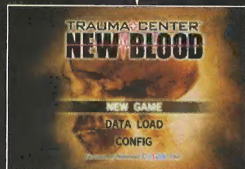

## ■ NEW GAME

### Creating a Save File

Trauma Center: New Blood has an auto-save feature, so before you start a new game, you will be prompted to create a save file. To create a save file, 2 blocks of memory are needed. If not enough memory is available, then the auto-save feature will not function.

### Name Entry

Here, you can enter a name consisting of up to eight letters. This will be the name displayed for any scores you post in the online rankings. Please avoid using a name that contains personal or private information.

# PLAYING THE GAME

## ▼ Progression

### <EPISODE SELECT>

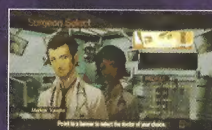

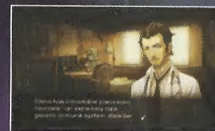

! On this screen, you can select which episode you'd like to play.

### <PRE-OPERATION>

! In these sequences, the story will be advanced through events and character interactions.

### <CONFERENCE>

! Information pertaining to the operation will be shared during the conference.  
 ▼ You will also be able to select which doctor you'd like to operate as.  
 NOTE: This option may not be available for all stages.

### <OPERATION>

! During an operation, you'll use the Wii Remote and Nunchuk to perform the procedure.

### <RESULTS>

! After a successful operation, the Results Screen will be displayed. Here, your performance will be evaluated and a score assigned.

### <POST-OPERATION>

! After the operation, the story will continue and new events may unfold.

### <EPISODE SELECT>

! After completing an episode, you can move on to the next one.
